the donor agencies supporting the activity or of the OECS Secretariat.

Literature Review for the Proposed Nevis Peak National Park and Camps River Watershed Area

For this review, Island Resources Foundation:

- A. Conducted a literature review to obtain existing information on the biodiversity within the proposed protected area;
- B. Re-surveyed local researchers, guides and locally linked students about studies of resource issues conducted on Nevis in recent years; and
- C. Prepared and submitted to the Department of Physical Planning and OECS/ESDU/PERB a report on the finding of the literature review, including an annotated bibliography of pertinent documents.

This material is presented in two separate sections.

The first section is the books, manuscripts, maps, guides, photographs and tapes listed below that are available in Nevis, mostly at the facilities of the Nevis Historical and Cultural Society. If numbered they are available at the Archives of Nevis History at the Bellvue Museum Building next to Government House.

The second section is the list of Selected References used in the course of researching the overall project and the Terrestrial Biodiversity Inventory and Status Assessment for the Proposed Nevis Peak Protected Area specifically. Some of *these* documents may not be available on Nevis.
